## Description

| Source | Recombinant Human B7-1/CD80 Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. |
| :--- | :--- |
|  | It contains Val35-Asn242. |
| Accession | P33681-1 |
| Molecular <br> Weight | The protein has a predicted MW of 26.8 kDa. Due to glycosylation, the protein migrates to 50-70 kDa based on <br> Tris-Bis PAGE result. |
| Endotoxin | Less than 1EU per $\mu$ g by the LAL method. |
| Purity | $>95 \%$ as determined by Tris-Bis PAGE |

## Formulation and Storage

| Formulation | Lyophilized from $0.22 \mu \mathrm{~m}$ filtered solution in PBS (pH 7.4). Normally $8 \%$ trehalose is added as protectant before <br> lyophilization. |
| :--- | :--- |
| Reconstitution | Centrifuge the tube before opening. Reconstituting to a concentration more than $100 \mu \mathrm{~g} / \mathrm{ml}$ is recommended. <br> Dissolve the lyophilized protein in distilled water. |
| Storage | -20 to $-80^{\circ} \mathrm{C}$ for 12 months as supplied from date of receipt. $-80^{\circ} \mathrm{C}$ for $3-6$ months after reconstitution. $2-8^{\circ} \mathrm{C}$ for $2-$ <br> 7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please <br> minimize freeze-thaw cycles. |

## Background

Cluster of differentiation 80 (also CD80 and B7-1) is a protein found on dendritic cells, activated B cells and monocytes that provides a costimulatory signal necessary for T cell activation and survival. It is the ligand for two different proteins on the T cell surface: CD28 and CTLA-4.

## Assay Data

Tris-bis PAGE

SEC-HPLC

Human B7-1 on Tris-Bis PAGE under reduced condition. The purity is greater than $95 \%$.

The purity of Human B7-1 is greater than $95 \%$ as determined by SEC-HPLC.

## Assay Data

## ELISA Data

Human B7-1, His Tag ELISA
$0.1 \mu \mathrm{~g}$ Human CTLA-4, hFc Tag Per Well

Log Human B7-1, His Tag Conc. $(\mu \mathrm{g} / \mathrm{ml})$
SPR Data

Immobilized Human CTLA-4, hFc Tag at $1 \mu \mathrm{~g} / \mathrm{ml}$ ( $100 \mu \mathrm{l} / \mathrm{well}$ ) on the plate. Dose response curve for Human B7-1, His Tag with the EC50 of $1.48 \mu \mathrm{~g} / \mathrm{ml}$ determined by ELISA.

Human B7-1, His Tag captured on CM5 Chip via Anti-His Antibody can bind Human CTLA4, hFc Tag with an affinity constant of 1.1 nM as determined in SPR assay (Biacore T200).
